WELCOME

Maple Leaf International School is a unique learning opportunity on the educational landscape of Trinidad and Tobago. Here, we provide a Canadian learning opportunity for all our students – from Junior Kindergarten to Grade Twelve. This positive and enriching experience is based on the curriculum and learning expectations of the Ontario Ministry of Education.

Canada is recognized as a world leader in education, and parents can be confident that their children will benefit, throughout their lives, by the learning that they encounter at Maple Leaf.

At Maple Leaf International School, it is our belief that life is not a set of instructions, but rather a series of experiences and learning processes. School is not just rules, or bricks and mortar. Our philosophy, then, is that our school is about character, about enriching minds and about providing experiences that will last a lifetime. We are proud of the fact that the majority of our graduates eagerly pursue post-secondary learning opportunities at renowned universities and institutions around the globe. We are committed to reach every student to help them achieve a successful outcome from the secondary school experience.

We also believe that by encouraging our students to become involved in school life through our extracurricular programs, we will have helped to foster well rounded individuals destined to be positive and contributing members to our society at large. Through student engagement, we support our students in refining those necessary skills, attitudes and aptitudes. Our students do make a difference in this world.

As we enter the new school year, we must thank those parents who believed in the value of the Canadian educational system, the Ontario curriculum and in a better learning opportunity for their children.

We are grateful for the many teachers who have come and gone, supporting students in their learning, and for those who today continue the programs and traditions of Maple Leaf. Our Board of Directors provides leadership and operates with care and deliberation. The Parent-Teacher Association supports the school through its many activities for both students and the community.

When Maple Leaf graduates venture forth into their next stage of life, they do so with knowledge, skills and confidence. They are well prepared for the future. They are also venturing forth with fond and lasting memories.

Maple Leaf Administration

BELIEFS & VALUES

We are a community of learners in which student success is most important. The measure of success is not only academic but also includes the development of personal and ethical dimensions. To achieve our goals, we embrace parents as our partners. We expect the highest professional standards of our teachers. Students accept personal responsibility for their learning and behaviour. Our program invites success employing a balanced curriculum in which students grow academically, socially and physically according to the needs of each. On-going assessment creates valid and reliable evaluation which provides for students to be corrected, re-focused and guided to success. Maple Leaf International School provides an education based on how students learn and live in the present, for participation as a productive healthy member of the international community in the future.

CODE OF STUDENT BEHAVIOUR

In the interest of maintaining a school dedicated to allowing students to learn and to make the most of their educational opportunities, a code of behaviour has been developed which outlines the responsibilities and expectations of the members of the Maple Leaf community.

RESPECT towards every person who enters the school

This means recognizing the equality of all persons by:

- according respect to members of every race, religion, culture, gender and age;
- using language which reflects due respect for self and others;
- not tolerating bullying and intimidation, play fighting of any sort, and any "hands-on" behaviour;
- not tolerating harassment with regards to sexuality or race.

RESPECT for property

This means:

- demonstrating respect for the property of others and the school;
- using care to maintain a clean, litter free school;

RESPECT for oneself

Student responsibilities include:

- arriving on time and prepared for classes;
- attending regularly;
- providing notes for absences;
- observing the policy prohibiting the use of alcohol and drugs;
- observing the policy of a smoke-free environment;
- wearing your uniform appropriately;
- giving your best effort at all times.

Maple Leaf recognizes that the majority of students are self-disciplined, that corrective actions suggested by this code will apply only to a minority of students, and that motivation and self-control are essential for positive growth to occur.

Guidance by all staff is intended to convey to students, as clearly as possible, that students are being helped to learn to be co-operative, fulfilled citizens, while maintaining their own individuality.

To serve the interests of students, a variety of strategies are employed. Students who do not exhibit self-discipline are counselled by school personnel to ensure that the standard of behaviour expected is clearly understood. Disciplinary actions, such as specific task assignments, an interview with the Principal, withdrawal of specific privileges, involvement of parents, suspension or permanent removal from school, will take into account the nature of the offence and the individual circumstances involved.

ONTARIO SECONDARY SCHOOL DIPLOMA (OSSD)

CREDIT DEFINITION

A **credit** is granted when a course of at least 110 hours is completed successfully.

Note: All courses listed in this calendar have a 1.0 credit value unless otherwise indicated.

REQUIREMENTS FOR THE ONTARIO SECONDARY SCHOOL DIPLOMA- O.S.S.D

TOTAL CREDITS TO GRADUATE (MINIMUM).....	30
COMPULSORY COURSES REQUIRED	18
ELECTIVE COURSES REQUIRED.....	12
ONTARIO SECONDARY LITERACY TEST	SUCCESSFUL COMPLETION
COMMUNITY INVOLVEMENT HOURS REQUIRED.....	40 HOURS

COMPULSORY CREDITS – 18

ENGLISH	4	CANADIAN GEOGRAPHY	1
MATHEMATICS	3	ARTS	1
SCIENCE	2	PHYSICAL HEALTH EDUCATION	1
FRENCH OR SPANISH	1	CIVICS	0.5
CANADIAN HISTORY	1	CAREER STUDIES	0.5

3 ADDITIONAL CREDITS, CONSISTING OF 1 CREDIT FROM EACH OF THE FOLLOWING GROUPS:

GROUP 1: ENGLISH (INCLUDING THE ONTARIO SECONDARY SCHOOL LITERACY COURSE), FRENCH AS A SECOND LANGUAGE, CLASSICAL LANGUAGES, INTERNATIONAL LANGUAGES, NATIVE LANGUAGES, CANADIAN AND WORLD STUDIES, NATIVE STUDIES, SOCIAL SCIENCES AND HUMANITIES, GUIDANCE AND CAREER EDUCATION, COOPERATIVE EDUCATION

GROUP 2: FRENCH AS A SECOND LANGUAGE, THE ARTS, BUSINESS STUDIES, HEALTH AND PHYSICAL EDUCATION, COOPERATIVE EDUCATION

GROUP 3: FRENCH AS A SECOND LANGUAGE, SCIENCE (GRADE 11 OR 12), COMPUTER STUDIES, TECHNOLOGICAL EDUCATION, COOPERATIVE EDUCATION

NOTE: THE FOLLOWING CONDITIONS APPLY TO SELECTIONS FROM THE ABOVE THREE GROUPS:

- A MAXIMUM OF 2 CREDITS IN FRENCH AS A SECOND LANGUAGE MAY COUNT AS ADDITIONAL COMPULSORY CREDITS, 1 CREDIT FROM GROUP 1, AND 1 CREDIT FROM EITHER GROUP 2 OR GROUP 3.
- A MAXIMUM OF 2 CREDITS IN COOPERATIVE EDUCATION MAY COUNT AS ADDITIONAL COMPULSORY CREDITS, SELECTED FROM ANY OF GROUPS 1, 2, OR 3.

SUBSTITUTION FOR COMPULSORY CREDITS

IN ORDER TO PROVIDE THE FLEXIBILITY TO TAILOR AN INDIVIDUAL STUDENT'S PROGRAM TO THE STUDENT'S NEEDS AND TO SUPPORT HIS OR HER PROGRESS THROUGH SECONDARY SCHOOL, PRINCIPALS MAY SUBSTITUTE UP TO THREE COMPULSORY CREDITS WITH COURSES FROM OTHER SUBJECT AREAS SPECIFIED IN THE LIST OF COMPULSORY CREDIT REQUIREMENTS. A COMMON EXAMPLE IS TO SUBSTITUTE SPANISH FOR FRENCH.

ELECTIVE CREDITS

Students earn these credits by successfully completing courses that they have selected from the courses listed as available in their school's program and course calendar.

The Provincial Secondary School Literacy Test (OSSLT)

The Ontario Secondary School Literacy Test (OSSLT) is the usual method for assessing the literacy skills of students in Ontario for the purpose of determining whether they meet the provincial secondary school literacy requirement for graduation. The test thus identifies students who have demonstrated the required skills in literacy as well as those who have not demonstrated the required skills and will need to do further work. The test identifies the specific areas in which these latter students need remediation.

The test is scheduled by and administered through the Education Quality and Accountability Office (EQAO) once a year, usually in the spring.

Students will usually take the OSSLT in Grade 10, unless a deferral is granted by the principal. Students who do not successfully complete the OSSLT will have opportunities to retake the test in subsequent years, on dates scheduled by the EQAO. Once students have successfully completed the OSSLT, they may not retake it.

Students who are English language learners may be entitled to special provisions. For students with special education needs, accommodations specified in the students' IEP must be available on the day of the test. Sample test materials are available at www.eqao.com.

If a student has had two opportunities to take the OSSLT and has failed it at least once, the student is eligible to enrol in the Ontario Secondary School Literacy Course (OSSLC). Principals have the discretion to allow a student to enrol in the OSSLC before he or she has had a second opportunity to take the OSSLT, if the principal determines that it is in the best educational interest of the student.

The credit earned for successfully completing the OSSLC may also be used to meet the Grade 11 or the Grade 12 compulsory credit requirement in English or to meet the Group 1 compulsory credit requirement for the Ontario Secondary School Diploma. A student cannot be granted credit for the OSSLC through the challenge process from the Prior Learning Assessment and Recognition Policy.

COMMUNITY INVOLVEMENT REQUIREMENTS (40 HOURS)

Students entering grade 9 must complete 40 hours of volunteer work as one of the Ministry requirements for their high school diploma. The aim is to encourage students to become actively involved in making positive contributions to their community. Students are encouraged to select many different community involvement activities in consultation with their parents. Selection of activities should take into account the age, maturity and ability of the student, the location and environment of the proposed activity, and the need for any special training, equipment and preparation. The safety of the student is paramount. Students are not paid for performing any community involvement activity.

The Community Involvement Passport and a list of eligible community involvement opportunities and organizations needing volunteers are available to students from Guidance. Students must complete their community involvement activities while in grades 9 – 12. The community involvement is completed outside of classroom hours, and may not be paid employment. Students can now begin accumulating their hours during the summer prior to entering Grade 9.

Students are encouraged to complete the 40 hours of community involvement as early as possible in high school ideally by the end of grade 10. Ministry guidelines have established eligible and ineligible activities for the community involvement requirement. Students and parents must follow these guidelines.

ONTARIO SECONDARY SCHOOL CERTIFICATE

A student who decides to leave school before earning the Ontario Secondary School Diploma will receive, on request, the Ontario Secondary School Certificate if a minimum of 14 credits are earned:

English	2 credits	Total Compulsory Courses/Credit	6
Mathematics	1 credit	Total Elective Courses/Credits	8
Science	1 credit		
Canadian History or		TOTAL CREDITS	14
Canadian Geography	1 credit		
Physical/Health Education	1 credit		

THE CERTIFICATE OF ACCOMPLISHMENT

Students who leave school before fulfilling the requirements for the Ontario Secondary School Diploma or the Ontario Secondary School Certificate may be granted a Certificate of Accomplishment. This certificate may be a useful means of recognizing achievement for students who plan to take certain vocational programs, other kinds of training, or who plan to find employment after leaving school. Students who return to school to complete additional credit and non-credit courses will have their transcripts updated accordingly, but will not be issued a new Certificate of Accomplishment.

STUDENT EVALUATION AND REPORTING

A number of evaluation methods are used throughout our courses to provide an accurate reflection of the level of success of each student. The types are numerous and directly reflect the nature of the course being studied. Final evaluations are held twice yearly, at the end of each semester (in January and June). A student's final achievement mark in a course is based on term work and final evaluation results. The proportion is determined by Ministry policy at 70% term work and 30% final evaluation. The final evaluation may be an exam and/or culminating activity. Ontario schools do not use rank or grade point average. Students receive report cards at mid-semester as an indication of progress.

Grading is based on the following scale:

80-100%	(A)	honours	Level 4 exceeds Ministry provincial standards
70-79%	(B)	very good	Level 3 meets Ministry provincial standards
60-69%	(C)	satisfactory	Level 2 approaching Ministry provincial standards
50-59%	(D)	poor	Level 1 limited grasp of Ministry provincial standards
Under 50%	(F)	failure	

REPORTING TIMELINE

End of September	Learning Skills Reports go home
After 9 weeks	Mid-Semester 1 Reports go home
Early November	Secondary Parent/Teacher Interviews
Late January	Secondary Semester 1 Final Reports go home
End of February	Learning Skills Reports go home
After 9 weeks	Mid-Semester 2 Reports go home
Mid April	Secondary Parent/Teacher Interviews
Early July	Secondary Semester 2 Final Reports are available for collection

The Learning Skills Reports which are issued in September and February, focus on the student's work habits and learning skills. These skills include Responsibility, Organization, Independent Work, Collaboration, Initiative and Self-Regulation. We have also included Uniform because we believe that our students' deportment also plays an important role in their success and development as independent, self-directed learners. This is one way of giving parents a "heads up" on how their child is settling in to their new courses at the beginning of each Semester. These skills are also part of the Provincial Report Card at mid-term and semester end.

PRIOR LEARNING AND RECOGNITION (PLAR)

For students transferring from home schooling, or a school outside Ontario, principals will grant equivalency credits for placement purposes based on their evaluation of the student's previous learning.

A general rule is that a student from Trinidad who has successfully completed:

Form 2 would begin grade 9

Form 3 may be granted up to 8 credits and may be placed in grade 10

Form 4 may be granted up to 16 credits and may be placed in grade 11

Form 5 may be granted up to a maximum of 23 equivalent credits

This assessment would be based on the following:

- i) marks and comments in courses at current school
- ii) results in CXC exams (minimum of 8)
- iii) results on the English and Mathematics tests administered by Maple Leaf
- iv) current age

All information listed will determine the student's placement in an appropriate grade and into specific courses.

SUPPORTS FOR ENGLISH AS A SECOND LANGUAGE LEARNERS

As part of our pre-admission assessment procedures, our ESL learners will be admitted with a graduated entry where possible. ESL students will initially be placed in performance based courses. Additionally, ESL students will have access to EA (educational assistance) support.

PREREQUISITE COURSES

Generally, a student must have successfully completed the prerequisite course at one grade to proceed to that subject at the next grade. If the student is planning to move from one level to the next, that student must go back and complete the previous course at the appropriate level. For example, a student who took Grade 9 Math at the Applied level, and wishes to try Grade 10 Math at the Academic level, would have to go back and do the Grade 9 Academic Math.

The Curriculum Policy documents for all of the courses offered by the school are on the website of the Ministry of Education for Ontario: www.edu.gov.on.ca.

SUBSTITUTIONS FOR PREREQUISITE COURSES

In order to meet the needs of individual students, the Principal will determine whether or not the prerequisite should be waived. Up to three prerequisite courses may be waived. The Principal will make the decision in consultation with the parent/guardian and appropriate school staff.

ALTERNATIVE WAYS OF EARNING CREDITS

The Independent Learning Centre is a provider of Ontario Ministry of Education high school credits in both paper and e-learning formats. Students complete course work independently, submitting assignments through the mail, or through email. Students are required to complete an exam at the end of the course. The student has 10 months to complete a course. Each course is divided into 4 units, and each unit contains 5 lessons for a total of 20 lessons (110 hours of instruction) and half-credit courses have 10 lessons in total (55 hours of instruction).

For a list of courses and policies access the website: www.ilc.org

ADVANCED PLACEMENT PROGRAM (AP)

AP enables students to pursue college-level studies while still in high school. Through 34 college-level courses, each culminating in a rigorous exam, AP provides willing and academically prepared students with the opportunity to earn college credit, advanced placement or both. Taking AP courses also demonstrates to college admission officers that students have sought out the most rigorous curriculum available to them.

Each AP course concludes with a college-level exam developed and scored by college and university faculty members as well as experienced AP teachers. AP Exams are an essential part of the AP experience, enabling students to demonstrate their mastery of college-level course work. AP is accepted by most two- and four-year colleges and universities worldwide for college credit, advanced placement or both on the basis of successful exam scores in the admission process and/or award credit and placement for qualifying scores.

Performing well on an AP Exam not only indicates the successful completion of a course. Research consistently shows that students who score a 3 or higher typically earn higher GPAs in college and have higher graduation rates than their non-AP student peers.

Visit the College Board's website for more information:

- Information about AP courses and exams:
www.apcentral.collegeboard.org
- Universities outside the United States that recognize AP
www.collegeboard.org/apintl

**** AP courses are not part of the Ontario curriculum and therefore do not count in the 30 credits to get a diploma.**

AP courses offered depend on enrolment. A minimum of 5 students is required for a course to run. Students require a minimum of 85% in the high school credit to apply for the AP course of study.

COOPERATIVE EDUCATION

Cooperative education is a program which places senior students into a working environment, to give them real world, hands-on experience in a job setting. Students work for 220 hours for 2 periods in the schedule for 2 credits. Cooperative credits are linked to the courses the student is taking, to allow transfer between the classroom and a job. Students are responsible for providing their own transportation to the job site. Evaluation is a combination of the cooperative education teacher and the placement supervisor.

Academic Honesty

It is the responsibility of the student to be honest in all aspects of their school work. Copying from another student, looking at another student's test or using secretive methods to share answers during a test are considered cheating. A student who is found cheating may receive a mark of zero. Administration and parents will be notified. A student who presents work done by others as if it were his/her own is plagiarizing. Likewise, omitting to reference the source of information is also considered plagiarism. Teachers will educate students as to proper referencing of sources. Students who plagiarize may be asked to do the assignment over again. A second offence may result in a mark of zero. Parents will be notified and a meeting with administration will be arranged.

Late and Missed Assignments

Students are responsible for completing the work assigned by a teacher in a timely fashion. Failure to submit assignments on time or at all, will result in consequences. Teachers will use a variety of methods to encourage prompt submission of work. These methods may include helping students to develop time management skills, chunking assignments into parts, so that the whole assignment isn't due all at once, negotiating due dates with students who are feeling overwhelmed, maintaining on-going communication with parents regarding due dates, setting up a student contract, providing alternative assignments, when appropriate, assigning detentions to complete work, and deducting marks for late assignments. A student's mark at the end of the course is an indication of the level of success on the expectations of the course. However, if many assignments are missing, the teacher may not be able to award a credit as the student may not have demonstrated all the expectations yet.

Student Records

Student records are maintained in the Ontario Student Record (OSR) file. These files are secure at the school and may be accessed by students and parents of students under the age of 18. The OSR contains registration material, report cards, literacy test results, community service records and a transcript of the student's marks. It may also contain Psycho-Educational testing results and other materials deemed by the principal to benefit the instruction of the student. The OSR is retained for 55 years after graduation of the student.

The Ontario Student Transcript (OST) is a record of the credits earned by the student between grades 9 and grade 12. It shows all successfully completed credits from grade 9 and 10, and all credits attempted in grades 11 and 12. Courses dropped more than 5 days after the mid-term report will show on the transcript as withdrawn with the mark at the withdrawal date.

Career and Guidance Education

Besides the Grade 10 course in Career Studies, the full-time guidance counsellor provides academic, attendance, career and post-secondary counselling. The guidance program, in ensuring that students conduct grade appropriate, guidance and career planning, oversees the creation and maintenance of an Individual Pathway Plan for each student that is kept in the student's Personal Profile and is accessible from home at any time. Additionally, our guidance department at Maple Leaf hosts a College and University Fair each fall, runs workshops on study skills, applying to college and university, and brings in guest speakers to ensure students have the information necessary to make informed career decisions. Our Co-operative education program allows students to explore career options before graduation.

CANADIAN POST SECONDARY DESTINATIONS

The Maple Leaf International operational structure and program delivery is geared toward University/College admission in Ontario, Canada. However, the Ontario Secondary School Diploma (O.S.S.D.) is recognized worldwide and, to that end, Maple Leaf International works to prepare the graduates for a variety of destinations.

Ontario Community Colleges

Ontario Community Colleges have excellent programs and degrees. They offer:

Certificate Programs	- 1 year
Diploma Programs	- 2 - 3 years
Applied Degrees	- 4 years

Entrance requires the completion of the Ontario Secondary School Diploma (OSSD), and may have courses at U/M/C level of difficulty.

For more specific requirements it is necessary to consult the individual College website or www.ontariocolleges.ca.

Ontario Universities

Ontario Universities require a minimum of six (6) Grade 12 University or University / College courses. These are courses that have a "U" or "M" as the 5th character in the course code. The universities will not accept College or Open courses for admission. These are courses that have "C" or "O" as the fifth character in the course codes.

Example: ENG4U or HSB4M > accepted for admission
 PPL4O or ENG4C > not accepted for admission

Most University programs have specific course requirements, so it is important that you research these requirements at www.electronicinfo.ca

If the University asks for a Grade 12 course as a prerequisite, they will not accept you without it. However, if the university states that it is a recommended course they will still consider your application. You should be aware that, if you don't have a recommended course, the University may accept you into the program and require that you take that course in your first year.

Students must consult the specific University or College website for eligibility and requirements. After option sheets have been returned, course changes may be made where appropriate and where space is available. Limited course changes will also be considered on days allocated at the start of each semester.

COURSE SELECTION PROCESS

The school administration and staff create a roster of courses based on student needs, diploma requirements, school size, finances, and staff expertise. Courses described on the following pages are **POSSIBLE OFFERINGS** for the coming academic year. Students should be mindful of compulsory requirements and prerequisites for further study when making choices.

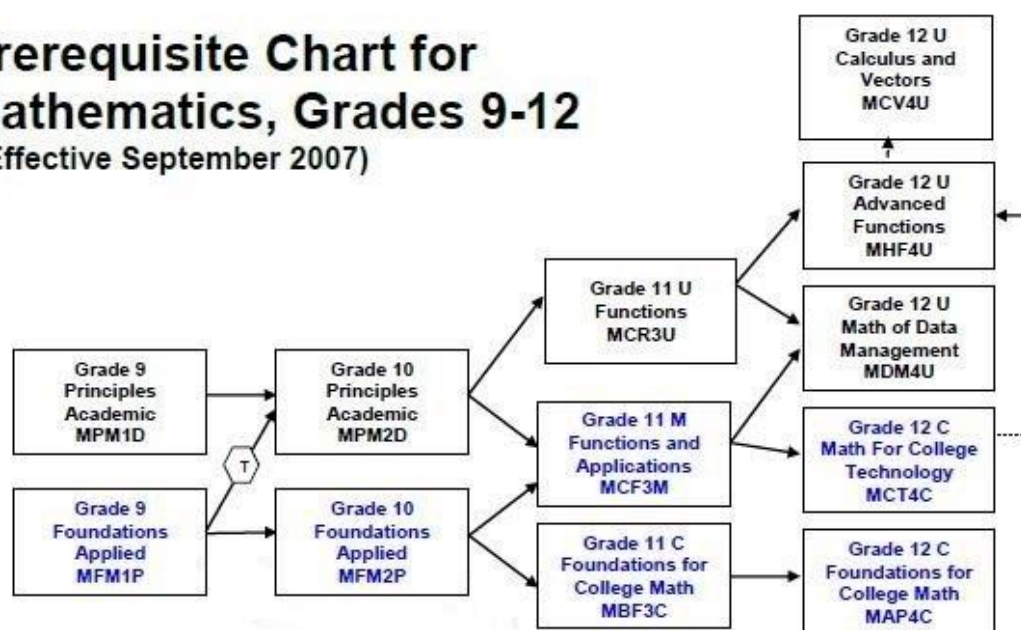

As all courses may not be offered, students should choose alternatives. When a student and parent sign the OPTION SHEET, they are agreeing to a **full semester commitment** to the courses chosen. Students and their parents must take this process seriously. A wise selection of courses allows a smooth start to the academic year and facilitates greater academic success. It might not be possible to change or drop a course when a student finds work too difficult. Teachers and the Guidance counsellor are available to discuss course selections with students throughout the course selection process. All course changes are subject to parent, teacher and administration approval. A student is able to switch pathways in grades nine and 10 freely in all subjects (although teacher consultation is strongly recommended) except Mathematics. Please see chart below for the Mathematics progression.

An individual course may not be timetabled if the number of students requesting the course is insufficient.

Students will have 2 weeks in first semester and 1 week in second semester to change classes. After that time, changes will only be made on the recommendation of the teacher or counsellor in consultation with the parents and teacher. Senior classes that are dropped before 5 days after the midterm report, will not show on the student's transcript. Courses dropped later than that will show on the transcript with the mark at dropping and a "W" for withdrawal in the credit column.

Please refer to the [Maple Leaf International School website](#) for links to the Ontario Ministry of Education Curriculum documents and *Growing Success*, Ontario's policy on Assessment and Evaluation. These links can be found by following **Secondary – Curriculum** on the MLIS website.

Prerequisite Chart for Mathematics, Grades 9-12 (Effective September 2007)

THE ORGANIZATION OF SECONDARY SCHOOL COURSES

The secondary school program is designed to provide all students with the essential knowledge and skills that they will need for the future, as well as the opportunity to specialize in areas that are related to their post-secondary goals.

GRADES 9 AND 10

In grades 9 and 10, three types of courses are offered: academic, applied and open courses.

Academic Courses (D)

Academic courses focus on the essential concepts of the discipline and also explore related concepts. Academic courses develop students' knowledge and skills by emphasizing theoretical, abstract applications of the essential concepts and incorporating practical applications as appropriate.

Applied courses (P)

Applied courses also focus on the essential concepts of the discipline, but develop students' knowledge and skills by emphasizing practical, concrete applications of these concepts and incorporating theoretical applications as appropriate. Academic and applied courses differ in the balance between essential concepts and additional material, *and in the balance between theory and application.*

Open Courses (O)

Open courses have one set of expectations for the discipline, appropriate for all students in a given grade. These courses are designed to prepare students for further study in certain subjects and to enrich their education.

GRADES 11 AND 12

In grades 11 and 12, the Ontario Curriculum has courses designed to prepare students for their post-secondary destinations. These include university preparation courses; university/college preparation courses; college preparation courses and workplace preparation courses. Open courses are also offered in grades 11 and 12.

University Preparation Courses (U)

University preparation courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for university programs. The range of courses offered and the content of these courses will allow students to prepare for university programs and related careers. Teaching and learning will emphasize theoretical aspects of the course content but will be based on rigorous provincial curriculum expectations and will emphasize the development of both independent research skills and independent learning skills. Students will be required to demonstrate that they have developed these skills.

University/College Preparation Courses (M)

University/College preparation courses include content that is relevant for both university and college programs. These courses are designed to equip students with the knowledge and skills they need to meet the entrance requirements for specific university and college programs. The range of courses offered and the content of these courses will allow students to prepare for college and university programs and related careers. Teaching and learning will emphasize both

theoretical aspects and related concrete applications of the course content. All university/college preparation courses will be based on rigorous provincial curriculum expectations and will emphasize the development of both independent research skills and independent learning skills. Students will be required to demonstrate that they have developed these skills.

College Preparation Courses (C)

College preparation courses are designed to equip students with the knowledge and the skills they need to meet the entrance requirements for college programs. The range of courses offered and the content of these courses will allow students to prepare for most college programs and related careers. Teaching and learning will emphasize concrete applications of the theoretical material covered in the course, and will also emphasize the development of critical thinking and problem solving skills. All college preparation courses will be based on rigorous provincial curriculum expectations and will emphasize the development of both independent research skills and independent learning skills. Students will be required to demonstrate that they have developed these skills.

Open Courses in Grades 11 and 12 (O)

Open courses in grades 11 and 12 allow students to broaden their knowledge and skills in a particular subject that may or may not be directly related to their post-secondary goals, but that reflects their interests. These courses are appropriate for all students regardless of post-secondary destination. These courses are designed to provide students with a broad educational base and to equip them for active and rewarding participation in society. **They are not designed with the specific requirements of university or college programs or the workplace in mind. Grade 12 Open courses are not to be used for university or college admission purposes.**

Workplace Preparation Courses (E) (not currently offered at Maple Leaf)

Workplace preparation courses are designed to equip students with the knowledge and skills they need for direct entry into the workplace or for admission to apprenticeship programs and other training programs offered in the community. The range and content of the courses offered will allow students to prepare for a variety of jobs, training programs and careers. Teaching and learning will emphasize workplace applications of the course content and will also explore the theoretical material that underlines these practical applications. Cooperative education and work experience placements within the community are important components of workplace preparation courses. Schools will involve employers and site supervisors in the planning of cooperative education and work experience placements, and will ensure that they have their cooperation and support in implementing these courses.

EXPLANATION OF COURSE CODES

Course Codes, Prerequisites and Descriptions

Each secondary school course is identified by a five character code

The first three characters refer to the subject.

Example: ENG is English

The fourth character refers to the grade or level.

1, 2, 3, 4 refers to grades 9, 10, 11, 12 respectively.

The fifth character refers to the type of course.

D = academic; P = applied; O = open; U = university; C = college; M = university/college; E = workplace

For example, the code for grade 9 Academic English is:

Course prerequisites can be found by referring to the italics text in the course charts. When choosing courses, make sure you refer to the prerequisites and to the OSSD diploma requirements.

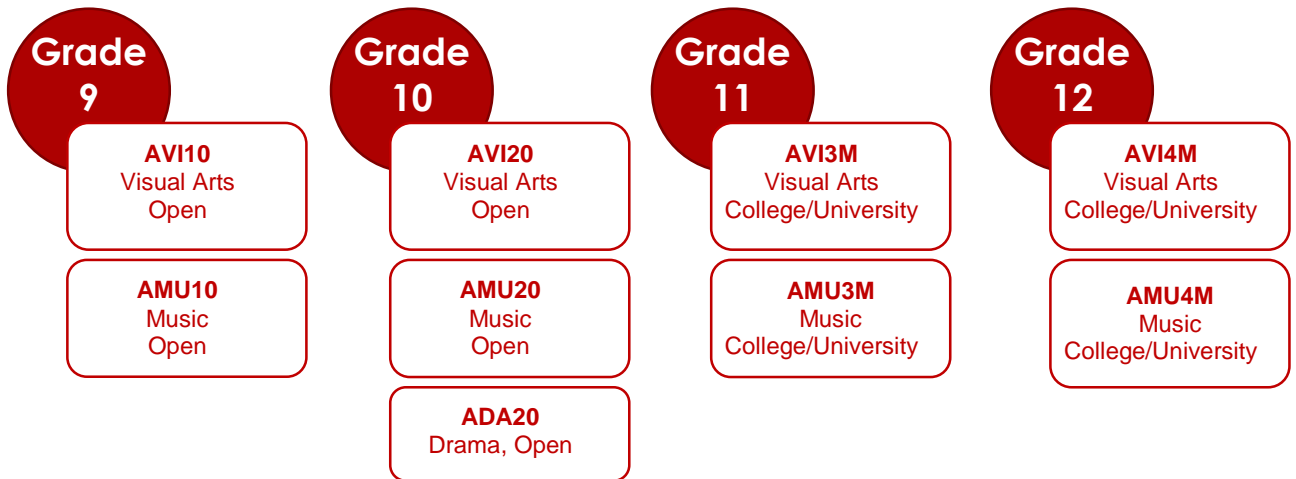

All courses listed have a credit value of 1.0 unless otherwise indicated. Prerequisites are noted where applicable. If none is listed, there are no prerequisites.

****A course may not be offered if there is insufficient enrolment****

COURSE DESCRIPTIONS

MUSIC

AMU10 MUSIC: PAN (STEEL DRUM), Grade 9, Open

This course emphasizes the performance of music at a level that strikes a balance between challenge and skill and is aimed at developing technique, sensitivity, and imagination. Students will participate in creative activities that teach them to listen with understanding. They will also learn correct musical terminology and its appropriate use.

AMU20 MUSIC: PAN (STEEL DRUM), Grade 10, Open

This course emphasizes performance of music at an intermediate level that strikes a balance between challenge and skill. Student learning will include participating in creative activities and listening perceptively. Students will also be required to develop a thorough understanding of the language of music, including the elements, terminology, and history.

AMU3M MUSIC: PAN (STEEL DRUM), Grade 11, University/College Preparation

This course provides students with opportunities to develop their musical literacy through the creation, appreciation, analysis, and performance of music, including traditional, commercial, and art music. Students will apply the creative process when performing appropriate technical exercises and repertoire and will employ the critical analysis processes when reflecting on, responding to, and analysing live and recorded performances. Students will consider the function of music in society and the impact of music on individuals and communities. They will explore how to apply skills developed in music to their life and careers. **Prerequisite: Grade 9 or 10 Music, Open**

AMU4M MUSIC: PAN (STEEL DRUM), Grade 12, University/College Preparation

This course enables students to enhance their musical literacy through the creation, appreciation, analysis, and performance of music. Students will perform traditional, commercial, and art music, and will respond with insight to live and recorded performances. Students will enhance their understanding of the function of music in society and the impact of music on themselves and various communities and cultures. Students will analyse how to apply skills developed in music to their life and careers. **Prerequisite: Grade 11 Music, University/College Preparation**

VISUAL ARTS

AVI10 VISUAL ARTS, Grade 9, Open

This course offers an overview of visual arts as a foundation for further study. Students will become familiar with the elements and principles of design and the expressive qualities of various materials through working with a range of materials, processes, techniques, and styles. They will learn and use methods of analysis and criticism and will study the characteristics of particular historical art periods and a selection of Canadian art and the art of other cultures.

AVI20 VISUAL ARTS, Grade 10, Open

This course emphasizes learning through practice; building on what students know; and introducing them to new ideas, materials, and processes for artistic thinking and experimentation. Student learning will include the refined application of the elements and principles of design, incorporating the creative and design processes, and the relationship between form and content. Students will also learn about the connections between works of art and their historical contexts. Course objectives may be achieved either through a comprehensive program or through a program focused on a particular art form (e.g., drawing, painting).

AVI3M VISUAL ARTS, Grade 11, University/College Preparation

This course focuses on studio activities on one or more of the visual arts. Students will create art works that explore a wide range of subject matter, and will evaluate art works, providing grounds for their aesthetic judgements. They will also examine historical and cultural contexts of Western art (including Canadian art) and art from various world cultures to support their study of specific media.

Prerequisite: *Grade 9 /10 Visual Arts, Open*

AVI4M VISUAL ARTS, Grade 12, University/College Preparation

This course focuses on the refinement of students' skills and knowledge in visual arts. Students will analyse art forms; use theories of art in analysing and producing art; and increase their understanding of stylistic changes in modern and contemporary Western art, Canadian (including Native Canadian) art, and art forms from various parts of the world. Students will produce a body of work demonstrating a personal approach. **Prerequisite:** *Grade 11 Visual Arts*

DRAMA

ADA2O DRAMA, Grade 10, Open

This course provides opportunities for students to explore dramatic forms, conventions, and techniques. Students will explore a variety of dramatic sources from various cultures and representing a range of genres. Students will use the elements of drama in creating and communicating through dramatic works. Students will assume responsibility for decisions made in the creative and collaborative processes and will reflect on their experiences.

BUSINESS STUDIES

BBI1O INTRODUCTION TO BUSINESS, Grade 9 or 10, Open

This course introduces students to the world of business. Students will develop an understanding of the functions of business, including accounting, marketing, information and communication technology, human resources, and production, and of the importance of ethics and social responsibility. This course builds a foundation for further studies in business and helps students develop the business knowledge and skills they will need in their everyday lives.

BTT2O INTRODUCTION & COMMUNICATION TECHNOLOGY IN BUSINESS, Grade 10, Open

This course introduces students to information and communication technology in a business environment and builds a foundation of digital literacy skills necessary for success in a technologically driven society. Students will develop word processing, spread sheet, database, desktop publishing, presentation software, and website design skills. Throughout the course, there is an emphasis on digital literacy, effective electronic research and communication skills, and current issues related to the impact of information and communication technology.

BAF3M FINANCIAL ACCOUNTING FUNDAMENTALS, Grade 11, University/College Preparation

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and ethics and current issues in accounting. **Prerequisite:** *None*

BMI3C MARKETING: GOODS, SERVICES, EVENTS, Grade 11, College Preparation

This course introduces the fundamental concepts of product marketing, which includes the marketing of goods, services, and events. Students will examine how trends, issues, global economic changes, and information technology influence consumer buying habits. Students will engage in marketing research, develop marketing strategies, and produce a marketing plan for a product of their choice. **Prerequisite:** *None*

BAT4M FINANCIAL ACCOUNTING PRINCIPLES, Grade 12, University/College Preparation

This course introduces students to advanced accounting principles that will prepare them for postsecondary studies in business. Students will learn about financial statements for various forms of business ownership and how those statements are interpreted in making business decisions. This course expands students' knowledge of sources of financing, further develops accounting methods for assets, and introduces accounting for partnerships and corporations.

Prerequisite: *Financial Accounting Fundamentals, Grade 11, University/College*

BBB4M INTERNATIONAL BUSINESS FUNDAMENTALS, Grade 12, University/College Preparation

This course provides an overview of the importance of international business and trade in the global economy and explores the factors that influence success in international markets. Students will learn about the techniques and strategies associated with marketing, distribution, and managing international business effectively. This course prepares students for postsecondary programs in business, including international business, marketing, and management. **Prerequisite:** *None*

BOH4M BUSINESS LEADERSHIP: MANAGEMENT FUNDAMENTALS, Grade 12, University/College Preparation

This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized. **Prerequisite:** *None*

CANADIAN AND WORLD STUDIES

CGC1D GEOGRAPHY OF CANADA, Grade 9, Academic

This course explores Canada's distinct and changing character and the geographic systems and relationships that shape it. Students will investigate the interactions of natural and human systems within Canada, as well as Canada's economic, cultural, and environmental connections to other countries. Students will use a variety of geotechnologies and inquiry and communication methods to analyse and evaluate geographic issues and represent their findings.

CHC2D CANADIAN HISTORY SINCE WORLD WAR I, Grade 10, Academic

This course explores the local, national, and global forces that have shaped Canada's national identity from World War I to the present. Students will investigate the challenges presented by economic, social, and technological changes and explore the contributions of individuals and groups to Canadian culture and society during this period. Students will use critical-thinking and communication skills to evaluate various interpretations of the issues and events of the period and to present their own points of view.

CHV2O CIVICS, Grade 10 Open, (1/2 credit taken with GLC20) – Credit Value .50

This course explores what it means to be an informed, participating citizen in a democratic society. Students will learn about the elements of democracy in local, national and global contexts, about political reactions to social change, and about political decision-making processes in Canada. They will explore their own and others' ideas and civics questions and learn how to think critically about public issues and react responsibly to them.

CGF3M FORCES OF NATURE: PHYSICAL PROCESSES AND DISASTERS, Grade 11, University/College

In this course, students will explore physical processes related to the earth's water, land, and air. They will investigate how these processes shape the planet's natural characteristics and affect human systems, how they are involved in the creation of natural disasters, and how they influence the impacts of human disasters. Throughout the course, students will apply the concepts of geographic thinking and the geographic inquiry process and use spatial technologies to analyse these processes, make predictions related to natural disasters, and assess ways of responding to them

Prerequisite: *Grade 9 Geography of Canada, Academic or Applied*

CLU3M UNDERSTANDING CANADIAN LAW, Grade 11, University/College Preparation

This course explores Canadian law, with a focus on legal issues that are relevant to the lives of people in Canada. Students will gain an understanding of laws relating to rights and freedoms in Canada; our legal system; and family, contract, employment, tort, and criminal law. Students will develop legal reasoning skills and will apply the concepts of legal thinking and the legal studies inquiry process when investigating a range of legal issues and formulating and communicating informed opinions about them.

Prerequisite: *Grade 10 Canadian History since World War I, Academic or Applied*

CGU4M WORLD GEOGRAPHY: URBAN PATTERNS AND POPULATION ISSUES, Grade 12, College/University Preparation

The world's population is growing, it is moving and intermixing, and it is increasingly found in cities. This course explores these changes and the challenges that come with them. Students will investigate the forces that are shaping the world's communities, the patterns of interaction between these communities, the quality of life within them, and their impact on the world around them. Students will apply the concepts of geographic thinking, the geographic inquiry process, and spatial skills and technologies as they investigate issues related to population change and urban life and propose ways of enhancing the sustainability of communities around the world.

Prerequisite: *Any university or university/college course in Canadian and World Studies, English, or Social Sciences and Humanities*

CLN4U CANADIAN AND INTERNATIONAL LAW, Grade 12, University Preparation

This course explores a range of contemporary legal issues and how they are addressed in both Canadian and international law. Students will develop an understanding of the principles of Canadian and international law and of issues related to human rights and freedoms, conflict resolution, and criminal, environmental, and workplace law, both in Canada and internationally. Students will apply the concepts of legal thinking and the legal studies inquiry process, and will develop legal reasoning skills, when investigating these and other issues in both Canadian and international contexts.

Prerequisite: *Any university or university/college preparation course in Canadian and World Studies, English, or Social Sciences and Humanities*

CHY4U WORLD HISTORY SINCE THE FIFTEENTH CENTURY, Grade 12, University Preparation

This course explores key developments and events in world history since approximately 1450, with a focus on interactions within and between various regions. Students will examine social, economic, and political developments and how they have affected different peoples. Students will extend their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key turning points in world history and historical forces that have shaped our world. **Prerequisite:** *Any university or university/college preparation course in Canadian and World Studies. English, or Social Science and Humanities*

ENGLISH

ENG1D ENGLISH, Grade 9, Academic

This course is designed to develop the oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods, interpret informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the use of strategies that contribute to effective communication. The course is intended to prepare students for the Grade 10 academic English course, which leads to university or college preparation courses in Grades 11 and 12.

ENG1P ENGLISH, Grade 9, Applied

This course is designed to develop the key oral communication, reading, writing, and media literacy skills students need for success in secondary school and daily life. Students will read, interpret, and create a variety of informational, literary, and graphic texts. An important focus will be on identifying and using appropriate strategies and processes to improve students' comprehension of texts and to help them communicate clearly and effectively. The course is intended to prepare students for the Grade 10 applied English course, which leads to college or workplace preparation courses in Grades 11 and 12.

ENG2D ENGLISH, Grade 10, Academic

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in their secondary school academic programs and in their daily lives. Students will analyze literary texts from contemporary and historical periods, interpret and evaluate informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on the selective use of strategies that contribute to effective communication. This course is intended to prepare students for the compulsory Grade 11 university or college preparation course. **Prerequisite: English, Grade 9, Academic or Applied**

ENG2P ENGLISH, Grade 10, Applied

This course is designed to extend the range of oral communication, reading, writing, and media literacy skills that students need for success in secondary school and daily life. Students will study and create a variety of informational, literary, and graphic texts. An important focus will be on the consolidation of strategies and processes that help students interpret texts and communicate clearly and effectively. This course is intended to prepare students for the compulsory Grade 11 college or workplace preparation course. **Prerequisite: English, Grade 9, Academic or Applied.**

ENG3C ENGLISH, Grade 11, College Preparation

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will study the content, form, and style of a variety of informational and graphic texts, as well as literary texts from Canada and other countries, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity. The course is intended to prepare students for the compulsory Grade 12 college preparation course. **Prerequisite: English, Grade 10, Academic or Applied**

ENG3U ENGLISH, Grade 11, University Preparation

This course emphasizes the development of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze challenging literary texts from various periods, countries, and cultures, as well as a range of informational and graphic texts, and create oral, written, and media texts in a variety of forms. An important focus will be on using language with precision and clarity and incorporating stylistic devices appropriately and effectively. The course is intended to prepare students for the compulsory Grade 12 university or college preparation course. **Prerequisite: English, Grade 10, Academic.**

EPS30 PRESENTATION AND SPEAKING SKILLS, Grade 11, Open

This course emphasizes the knowledge and skills required to plan and make effective presentations and to speak effectively in both formal and informal contexts, using such forms as reports, speeches, debates, panel discussions, storytelling, recitations, interviews, and multimedia presentations. Students will research and analyze the content and characteristics of convincing speeches and the techniques of effective speakers; design and rehearse presentations for a variety of purposes and audiences; select and use visual and technological aids to enhance their message; and assess the effectiveness of their own and others' presentations. **Prerequisite: English, Grade 10, Academic or Applied.**

EMS30 MEDIA STUDIES, Grade 11, Open

This course emphasizes the knowledge and skills that will enable students to understand media communication in the twenty-first century and to use media effectively and responsibly. Through analysing the forms and messages of a variety of media works and audience responses to them, and through creating their own media works, students will develop critical thinking skills, aesthetic and ethical judgement, and skills in viewing, representing, listening, speaking, reading, and writing. **Prerequisite: English, Grade 10, Academic or Applied.**

ENG4C ENGLISH, Grade 12, College Preparation

This course emphasizes the consolidation of literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a variety of informational and graphic texts, as well as literary texts from various countries and cultures, and create oral, written, and media texts in a variety of forms for practical and academic purposes. An important focus will be on using language with precision and clarity and developing greater control in writing. The course is intended to prepare students for college or the workplace.

Prerequisite: English, Grade 11, University or College

ENG4U ENGLISH, Grade 12, University Preparation

This course emphasizes the consolidation of the literacy, communication, and critical and creative thinking skills necessary for success in academic and daily life. Students will analyze a range of challenging literary texts from various periods, countries, and cultures; interpret and evaluate informational and graphic texts; and create oral, written, and media texts in a variety of forms. An important focus will be on using academic language coherently and confidently, selecting the reading strategies best suited to particular texts and particular purposes for reading, and developing greater control in writing. The course is intended to prepare students for university, college, or the workplace.

Prerequisite: English, Grade 11, University

EWC4U THE WRITER'S CRAFT, Grade 12, University Preparation

This course emphasizes knowledge and skills related to the craft of writing. Students will analyze models of effective writing; use a workshop approach to produce a range of works; identify and use techniques required for specialized forms of writing; and identify effective ways to improve the quality of their writing. They will also complete a major paper as part of a creative or analytical independent study project and investigate opportunities for publication and for writing careers.

Prerequisite: English, Grade 11, University

EBT40 BUSINESS AND TECHNOLOGICAL COMMUNICATION, Grade 12, Open

This course emphasizes practical writing and communication skills that are needed in the world of business and technology. Students will analyse the characteristics of effective models of business and technical communications; gather information to write reports, business letters, memos, manuals, instructions, and brochures; and integrate graphics and text, using technology appropriately for formatting and special effects. They will also make a number of oral and visual presentations.

Prerequisite: English, Grade 11, University Preparation, College Preparation, or Workplace Preparation

INTERNATIONAL LANGUAGES

LWSBD SPANISH, Academic (Level 2)

This introductory course is designed to enable students to begin to develop competence in listening, speaking, reading, and writing in the language of study. Students will participate in interactive activities in practical situations in which they can apply and develop their language skills to communicate with native speakers of the language. They will explore aspects of culture in regions of the world where the language is spoken, including social customs, naming practices, family life and relationships, food, sports, popular festivals and celebrations.

Prerequisite: *Previous Knowledge or Education in Spanish*

LWSCU SPANISH, (Level 3)

This course offers students' opportunities to further develop competence and confidence in listening, speaking, reading, and writing in the language of study. Students will participate in interactive activities (e.g., discussions about daily lives of youth, travel, shopping) in which they will further develop their knowledge of linguistic elements. They will continue to explore aspects of culture in regions of the world where the language is spoken, including fashion, historical figures, music and dance. Students will enhance their critical and creative thinking skills through reading diverse materials, including original literature, and will explore a variety of personal and professional contexts in which knowledge of the international language is required.

Prerequisite: *International languages, Level 2, University Preparation*

LWSDU SPANISH, (Level 4), University Preparation

This course prepares students for postsecondary studies in the international language being studied. Students will continue to refine and enhance their listening, speaking, reading, and writing skills in the language, with the goal of using these communication skills in a variety of personal, academic, and professional contexts. Using a wide variety of sources, including original texts in the language, students will consolidate their language skills as they use increasingly complex linguistic elements and language conventions. Students will also have opportunities to enrich their knowledge of aspects of culture in regions where the language is spoken, including issues related to popular culture, linguistic communities in Canada, literature, history, geography, and the arts.

Prerequisite: *LWSCU, (Level 3) LWSDU may be used for university admission.*

FSF10 FRENCH, Grade 9 Open

This is an introductory course for students who have little or no knowledge of French or who have not accumulated the minimum of 600 hours of elementary Core French instruction. Students will begin to understand and speak French in guided and structured interactive settings, and will develop fundamental skills in listening, speaking, reading, and writing through discussing issues and situations that are relevant to their daily lives. Throughout the course, students will develop their awareness of diverse French-speaking communities in Canada and acquire an understanding and appreciation of these communities. They will also develop a variety of skills necessary for lifelong language learning.

Prerequisite: *None*

FSF20 FRENCH, Grade 10, Open

This course provides opportunities for students to speak French in guided and structured interactive settings. Students will communicate about matters of personal interest and familiar topics through listening, speaking, reading, and writing in real-life situations, using print, oral, visual, and electronic texts. Students will develop a general understanding and appreciation of diverse French-speaking communities, as well as skills necessary for lifelong language learning.

Prerequisite: *Core French, Grade 9, Open*

FSF30 FRENCH, Grade 11, Open

This course provides opportunities for students to speak and interact in French in real-life situations. Students will develop their ability to communicate, making connections to previous experiences and using newly acquired skills in listening, speaking, reading, and writing. They will also increase their understanding and appreciation of diverse French-speaking communities, and will develop skills necessary for lifelong language learning.

Prerequisite: Core French, Grade 10, Academic, Applied, or Open

GUIDANCE AND CAREER EDUCATION

GLS10 LEARNING STRATEGIES 1: SKILLS FOR SUCCESS IN SECONDARY SCHOOL, Grade 9, Open

This course focuses on learning strategies to help students become better, more independent learners. Students will learn how to develop and apply literacy and numeracy skills, personal management skills, and interpersonal and teamwork skills to improve their learning and achievement in school, the workplace, and the community. This course helps students build confidence and motivation to pursue opportunities for success in secondary school and beyond. **Prerequisite:** Recommendation of principal.

GLC20 CAREER STUDIES, Grade 10 Open, (1/2 credit, taken with CHV20) Credit Value .50

This course teaches students how to develop and achieve personal goals for future learning, work, and community involvement. Students assess their interests, skills and characteristics and investigate current economic and workplace trends, work opportunities, and ways to search for work. The course explores post-secondary learning and career options, prepares students for managing work and life transitions, and helps students focus on their goals through the development of a career plan.

GLE20 LEARNING STRATEGIES 2: SKILLS FOR SUCCESS IN SECONDARY SCHOOL, Grade 10, Open

This course focuses on learning strategies to help students become better, more independent learners. Students will learn how to develop and apply literacy and numeracy skills, personal management skills, and interpersonal and teamwork skills to improve their learning and achievement in school, the workplace, and the community. This course helps students build confidence and motivation to pursue opportunities for success in secondary school and beyond. **Prerequisite:** Recommendation of principal.

GPP30 LEADERSHIP AND PEER SUPPORT, Grade 11, Open

This course prepares students to act in leadership and peer support roles. They will design and implement a plan for contributing to their school and/or community; develop skills in communication, interpersonal relations, teamwork, and conflict management; and apply those skills in leadership and/or peer support roles – for example, as a student council member or a peer tutor. Students will examine group dynamics and learn the value of diversity within groups and communities.

COOP42 COOPERATIVE EDUCATION, GRADE 11 or 12 (2 credits)

Cooperative education integrates classroom theory with workplace experience. Senior students can earn additional credits in a subject area already studied by completing hours at a related job placement. The program is a partnership of school and business/industry and involved students, teachers and employers. Students will participate in a half-day (2 periods) Cooperative Education program. Students complete 220 hours on the job and in school sessions (pre-employment and integration sessions) for 2 credits which apply toward the Ontario Secondary School Diploma.

HEALTH & PHYSICAL EDUCATION*

PPL10 HEALTHY ACTIVE LIVING EDUCATION, Grade 9, Open

This course equips students with the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

PPL20 HEALTHY ACTIVE LIVING EDUCATION, Grade 10, Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities, students develop knowledge and skills related to movement competence and personal fitness that provide a foundation for active living. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

PPL30 HEALTHY ACTIVE LIVING EDUCATION, Grade 11, Open

This course enables students to further develop the knowledge and skills they need to make healthy choices now and lead healthy, active lives in the future. Through participation in a wide range of physical activities and exposure to a broader range of activity settings, students enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

PPL40 HEALTHY ACTIVE LIVING EDUCATION, Grade 12, Open

This course enables students to further develop the knowledge and skills they need to make healthy choices. It places special emphasis on how students can maintain the habits of healthy, active living throughout their lives as they make the transition to adulthood and independent living. Through participation in a wide range of physical activities in a variety of settings, students can enhance their movement competence, personal fitness, and confidence. Students also acquire an understanding of the factors and skills that contribute to healthy development and learn how their own well-being is affected by, and affects, the world around them. Students build their sense of self, learn to interact positively with others, and develop their ability to think critically and creatively.

****All students enrolled in Physical Education course, will be expected to pay an additional fee of \$200.***

PSK4U INTRODUCTORY KINESIOLOGY, Grade 12, University Preparation

This course focuses on the study of human movement and of systems, factors and principles involved in human development. Students will learn about the effects of physical activity on health and performance, the evolution of physical activity and sport, and the physiological, psychological, and social factors that influence an individual's participation in physical activity and sport. The course prepares students for university programs in physical education and health, kinesiology, health sciences, health studies, recreation, and sports administration.

Prerequisite: Any Grade 11 university or university/college preparation course in science, or any Grade 11 or 12 course in health and physical education.

MATHEMATICS

MPM1D PRINCIPLES OF MATHEMATICS, Grade 9, Academic

This course enables students to develop an understanding of mathematical concepts related to algebra, analytic geometry, and measurement and geometry through investigation, the effective use of technology, and abstract reasoning. Students will investigate relationships, which they will then generalize as equations of lines, and will determine the connections between different representations of a linear relation. They will also explore relationships that emerge from the measurement of three-dimensional figures and two-dimensional shapes. Students will reason mathematically and communicate their thinking as they solve multi-step problems.

MFM1P FOUNDATIONS OF MATHEMATICS, Grade 9, Applied

This course enables students to develop an understanding of mathematical concepts related to introductory algebra, proportional reasoning, and measurement and geometry through investigation, the effective use of technology, and hands-on activities. Students will investigate real-life examples to develop various representations of linear relations, and will determine the connections between the representations. They will also explore certain relationships that emerge from the measurement of three-dimensional figures and two-dimensional shapes. Students will consolidate their mathematical skills as they solve problems and communicate their thinking.

MPM2D PRINCIPLES OF MATHEMATICS, Grade 10, Academic

This course enables students to broaden their understanding of relationships and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and abstract reasoning. Students will explore quadratic relations and their applications; solve and apply linear systems; verify properties of geometric figures using analytic geometry; and investigate the trigonometry of right and acute triangles. Students will reason mathematically and communicate their thinking as they solve multi-step problems. **Prerequisite: Principles of Mathematics, Grade 9 Academic**

MFM2P FOUNDATIONS OF MATHEMATICS, Grade 10, Applied

This course enables students to consolidate their understanding of linear relations and extend their problem-solving and algebraic skills through investigation, the effective use of technology, and hands-on activities. Students will develop and graph equations in analytic geometry; solve and apply linear systems, using real-life examples; and explore and interpret graphs of quadratic relations. Students will investigate similar triangles, the trigonometry of right triangles, and the measurement of three-dimensional figures. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. **Prerequisite: Principles of Mathematics, Grade 9, Academic, Foundations of Mathematics Grade 9 Applied**

MCF3M FUNCTIONS AND APPLICATIONS, Grade 11, University/College Preparation

This course introduces basic features of the function by extending students' experiences with quadratic relations. It focuses on quadratic, trigonometric, and exponential functions and their use in modeling real-world situations. Students will represent functions numerically, graphically, and algebraically; simplify expressions; solve equations; and solve problems relating to applications. Students will reason mathematically and communicate their thinking as they solve multi-step problems. **Prerequisite: Principles of Mathematics, Grade 10, Academic, or Foundations of Mathematics, Grade 10, Applied.**

MCR3U FUNCTIONS, Grade 11, University Preparation

This course introduces the mathematical concept of the function by extending students' experiences with linear and quadratic relations. Students will investigate properties of discrete and continuous functions, including trigonometric and exponential functions; represent functions numerically, algebraically, and graphically; solve problems involving applications of functions; investigate inverse functions; and develop facility in determining equivalent algebraic expressions. Students will reason mathematically and communicate their thinking as they solve multi-step problems. **Prerequisite: Principles of Mathematics, Grade 10, Academic**

MBF3C FOUNDATIONS FOR COLLEGE MATHEMATICS, Grade 11, College Preparation

This course enables students to broaden their understanding of mathematics as a problem-solving tool in the real world. Students will extend their understanding of quadratic relations; investigate situations involving exponential growth; solve problems involving compound interest; solve financial problems connected with vehicle ownership; develop their ability to reason by collecting, analyzing, and evaluating data involving one variable; connect probability and statistics; and solve problems in geometry and trigonometry. Students will consolidate their mathematical skills as they solve problems and communicate their thinking. **Prerequisite: Foundations of Mathematics, Grade 10, Applied**

MHF4U ADVANCED FUNCTIONS, Grade 12, University Preparation

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs. **Prerequisite: Functions, Grade 11, University, or Mathematics for College Technology, Grade 12, College**

MCV4U CALCULUS AND VECTORS, Grade 12, University Preparation

This course builds on students' previous experience with functions and their developing understanding of rates of change. Students will solve problems involving geometric and algebraic representations of vectors and representations of lines and planes in three-dimensional space; broaden their understanding of rates of change to include the derivatives of polynomial, sinusoidal, exponential, rational, and radical functions; and apply these concepts and skills to the modeling of real-world relationships. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended for students who choose to pursue careers in fields such as science, engineering, economics, and some areas of business, including those students who will be required to take a university-level calculus, linear algebra, or physics course. **Note: The Advanced Functions course (MHF4U) must be taken prior to or concurrently with Calculus and Vectors (MCV4U).**

MDM4U MATHEMATICS OF DATA MANAGEMENT, Grade 12, University Preparation

This course broadens students' understanding of mathematics as it relates to managing data. Students will apply methods for organizing and analyzing large amounts of information; solve problems involving probability and statistics; and carry out a culminating investigation that integrates statistical concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. Students planning to enter university programs in business, the social sciences, and the humanities will find this course of particular interest. **Prerequisite: Functions, Grade 11, University or Functions and Applications, Grade 11, University/College**

MCT4C MATHEMATICS FOR COLLEGE TECHNOLOGY, Grade 12, College Preparation

This course enables students to extend their knowledge of functions. Students will investigate and apply properties of polynomial, exponential, and trigonometric functions; continue to represent functions numerically, graphically, and algebraically; develop facility in simplifying expressions and solving equations; and solve problems that address applications of algebra, trigonometry, vectors, and geometry. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for a variety of college technology programs. **Prerequisite: Functions and Applications, Grade 11, University/College, or Functions, Grade 11, University**

MAP4C FOUNDATIONS FOR COLLEGE MATHEMATICS, Grade 12, College Preparation

This course enables students to broaden their understanding of real-world applications of mathematics. Students will analyse data using statistical methods; solve problems involving applications of geometry and trigonometry; solve financial problems connected with annuities, budgets, and renting or owning accommodation; simplify expressions; and solve equations. Students will reason mathematically and communicate their thinking as they solve multi-step problems. This course prepares students for college programs in areas such as business, health sciences, and human services, and for certain skilled trades. **Prerequisite: Foundations for College Mathematics, Grade 11, College Preparation, or Functions and Applications, Grade 11, University/College Preparation**

SCIENCE

SNC1D SCIENCE, Grade 9, Academic

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to relate science to technology, society, and the environment. Throughout the course, students will develop their skills in the processes of scientific investigation. Students will acquire an understanding of scientific theories and conduct investigations related to sustainable ecosystems; atomic and molecular structures and the properties of elements and compounds; the study of the universe and its properties and components; and the principles of electricity.

SNC1P SCIENCE, Grade 9, Applied

This course enables students to develop their understanding of basic concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science to everyday situations. They are also given opportunities to develop practical skills related to scientific investigation. Students will plan and conduct investigations into practical problems and issues related to the impact of human activity on ecosystems; the structure and properties of elements and compounds; space exploration and the components of the universe; and static and current electricity.

SNC2D SCIENCE, Grade 10, Academic

This course enables students to enhance their understanding of concepts in biology, chemistry, earth and space science, and physics, and of the interrelationships between science, technology, society, and the environment. Students are also given opportunities to further develop their scientific investigation skills. Students will plan and conduct investigations and develop their understanding of scientific theories related to the connections between cells and systems in animals and plants; chemical reactions, with a particular focus on acid-base reactions; forces that affect climate and climate change; and the interaction of light and matter. **Prerequisite: Science, Grade 9 Academic or Applied**

SNC2P SCIENCE, Grade 10, Applied

This course enables students to develop a deeper understanding of concepts in biology, chemistry, earth and space science, and physics, and to apply their knowledge of science in real-world situations. Students are given opportunities to develop further practical skills in scientific investigation. Students will plan and conduct investigations into everyday problems and issues related to human cells and body systems; chemical reactions; factors affecting climate change; and the interaction of light and matter. **Prerequisite: Science, Grade 9, Academic or Applied**

SBI3U BIOLOGY, Grade 11, University Preparation

This course furthers students' understanding of the processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biodiversity; evolution; genetic processes; the structure and function of animals; and the anatomy, growth, and function of plants. The course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation. **Prerequisite: Science, Grade 10, Academic**

SBI3C BIOLOGY, Grade 11, College Preparation

This course focuses on the processes that occur in biological systems. Students will learn concepts and theories as they conduct investigations in the areas of cellular biology, microbiology, genetics, the anatomy of mammals, and the structure of plants and their role in the natural environment. Emphasis will be placed on the practical application of concepts, and on the skills needed for further study in various branches of the life sciences and related fields. **Prerequisite: Science, Grade 10, Academic or Applied**

SCH3U CHEMISTRY, Grade 11, University Preparation

This course enables students to deepen their understanding of chemistry through the study of the properties of chemicals and chemical bonds; chemical reactions and quantitative relationships in those reactions; solutions and solubility; and atmospheric chemistry and the behaviour of gases. Students will further develop their analytical skills and investigate the qualitative and quantitative properties of matter, as well as the impact of some common chemical reactions on society and the environment.

Prerequisite: *Grade 10 Science, Academic*

SPH3U PHYSICS, Grade 11, University Preparation

This course develops students' understanding of the basic concepts of physics. Students will explore kinematics, with an emphasis on linear motion; different kinds of forces, energy transformations; the properties of mechanical waves and sound; and electricity and magnetism. They will enhance their scientific investigation skills as they test laws of physics. In addition, they will analyse the interrelationships between physics and technology, and consider the impact of technological applications of physics on society and the environment. **Prerequisite:** *Grade 10 Science, Academic*

SVN3M ENVIRONMENTAL SCIENCE, Grade 11, University/College Preparation

This course provides students with the fundamental knowledge of and skills relating to environmental science that will help them succeed in life after secondary school. Students will explore a range of topics, including the role of science in addressing contemporary environmental challenges; the impact of the environment on human health; sustainable agriculture and forestry; the reduction and management of waste; and the conservation of energy. Students will increase their scientific and environmental literacy and examine the interrelationships between science, the environment, and society in a variety of areas.

Prerequisite: *Grade 10 Science, Applied or Academic*

SBI4U BIOLOGY, Grade 12, University Preparation

This course provides students with the opportunity for in-depth study of the concepts and processes that occur in biological systems. Students will study theory and conduct investigations in the areas of biochemistry, metabolic processes, molecular genetics, homeostasis, and population dynamics. Emphasis will be placed on achievement of the detailed knowledge and refined skills needed for further study in various branches of the life sciences and related fields. **Prerequisite:** *Grade 11 Biology, University*

SCH4U CHEMISTRY, Grade 12, University Preparation

This course enables students to deepen their understanding of chemistry through the study of organic chemistry, the structure and properties of matter, energy changes and rates of reaction, equilibrium in chemical systems, and electrochemistry. Students will further develop problem-solving and investigation skills as they investigate chemical processes, and will refine their ability to communicate scientific information. Emphasis will be placed on the importance of chemistry in everyday life and on evaluating the impact of chemical technology on the environment. **Prerequisite:** *Grade 11 Chemistry, University*

SPH4U PHYSICS, Grade 12, University Preparation

This course enables students to deepen their understanding of physics concepts and theories. Students will continue their explorations of energy transformations and the forces that affect motion, and will investigate electrical, gravitational, and magnetic fields and electromagnetic radiation. Students will also explore the wave nature of light, quantum mechanics, and special relativity. They will further develop their scientific investigation skills, learning, for example, how to analyse, qualitatively and quantitatively, data related to a variety of physics concepts and principles. Students will also consider the impact of technological applications of physics on society and the environment. **Prerequisite:** *Grade 11 Physics, University*

SNC4M HEALTH SCIENCE, Grade 12, University/College Preparation

This course enables students, including those pursuing postsecondary programs outside the sciences, to increase their understanding of science and contemporary social and environmental issues in health-related fields. Students will explore a variety of medical technologies, pathogens and disease, nutritional science, public health issues, and biotechnology. The course focuses on the theoretical aspects of the topics under study and helps refine students' scientific investigation skills.

Prerequisite: *Science, Grade 10, Academic, or any Grade 11 university, university/college, or college preparation course in science*

SOCIAL SCIENCES AND HUMANITIES

HSP3U INTRODUCTION TO ANTHROPOLOGY, PSYCHOLOGY, AND SOCIOLOGY, Grade 11, University Preparation

This course provides students with opportunities to think critically about theories, questions, and issues related to anthropology, psychology, and sociology. Students will develop an understanding of the approaches and research methods used by social scientists. They will be given opportunities to explore theories from a variety of perspectives, to conduct social science research, and to become familiar with current thinking on a range of issues within the three disciplines. **Prerequisite: The Grade 10 academic course in English, or the Grade 10 academic History course**

HSP3C INTRODUCTION TO ANTHROPOLOGY, PSYCHOLOGY, AND SOCIOLOGY, Grade 11, College Preparation

This course introduces students to theories, questions, and issues related to anthropology, psychology, and sociology. Students learn about approaches and research methods used by social scientists. Students will be given opportunities to apply theories from a variety of perspectives, to conduct social science research, and to become familiar with current issues within the three disciplines. **Prerequisite: None**

HFC3M FOOD AND CULTURE, Grade 11, University/College Preparation

This course focuses on the flavours, aromas, cooking techniques, foods, and cultural traditions of world cuisines. Students will explore the origins of and developments in diverse food traditions. They will demonstrate the ability to cook with ingredients and equipment from a variety of cultures, compare food-related etiquette in many countries and cultures, and explain how Canadian food choices and traditions have been influenced by other cultures. Students will develop practical skills and apply social science research methods while investigating foods and food practices from around the world.

Prerequisite: None

***All students enrolled in this course, will be expected to pay an additional course fee of \$500.**

HHS4U FAMILIES IN CANADA, Grade 12, University Preparation

This course enables students to draw on sociological, psychological, and anthropological theories and research to analyse the development of individuals, intimate relationships, and family and parent-child relationships. Students will focus on issues and challenges facing individuals and families in Canada's diverse society. They will develop analytical tools that enable them to assess various factors affecting families and to consider policies and practices intended to support families in Canada. They will develop the investigative skills required to conduct and communicate the results of research on individuals, intimate relationships, and parent-child relationships. **Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and World Studies**

HHS4C FAMILIES IN CANADA, Grade 12, College Preparation

This course enables students to develop an understanding of social science theories as they apply to individual development, the development of intimate relationships, and family and parent-child relationships. Students will explore a range of issues relating to the development of individuals and families in contemporary Canadian society as well as in other cultures and historical periods. They will develop the investigative skills required to conduct research on individuals, intimate relationships, and parent-child roles and relationships in Canada. **Prerequisite: Any university, college, or university/college preparation course in social sciences and humanities, English, or Canadian and World Studies**

HSB4U CHALLENGE AND CHANGE IN SOCIETY, Grade 12, University Preparation

This course focuses on the use of social science theories, perspectives, and methodologies to investigate and explain shifts in knowledge, attitudes, beliefs, and behaviour and their impact on society. Students will critically analyse how and why cultural, social, and behavioural patterns change over time. They will explore the ideas of social theorists and use those ideas to analyse causes of and responses to challenges such as technological change, deviance, and global inequalities. Students will explore ways in which social science research methods can be used to study social change. **Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and world studies**

HFA4U NUTRITION AND HEALTH, Grade 12, University Preparation

This course examines the relationships between food, energy balance, and nutritional status; the nutritional needs of individuals at different stages of life; and the role of nutrition in health and disease. Students will evaluate nutrition-related trends and will determine how food choices can promote food security and environmental responsibility. Students will learn about healthy eating, expand their repertoire of food-preparation techniques, and develop their social science research skills by investigating issues related to nutrition and health.

Prerequisite: Any university or university/college preparation course in social sciences and humanities, English, or Canadian and World Studies

***All students enrolled in this course, will be expected to pay an additional course fee of \$500.**

TECHNOLOGICAL EDUCATION

ICS3U INTRODUCTION TO COMPUTER SCIENCE, Grade 11, University Preparation

This course introduces students to computer science. Students will design software independently and as part of a team, using industry-standard programming tools and applying the software development life-cycle model. They will also write and use subprograms within computer programs. Students will develop creative solutions for various types of problems as their understanding of the computing environment grows. They will also explore environmental and ergonomic issues, emerging research in computer science, and global career trends in computer-related fields. **Prerequisite: None**

ICS4U COMPUTER SCIENCE, Grade 12, University Preparation

This course enables students to further develop knowledge and skills in computer science. Students will use modular design principles to create complex and fully documented programs, according to industry standards. Student teams will manage a large software development project, from planning through to project review. Students will also analyse algorithms for effectiveness. They will investigate ethical issues in computing and further explore environmental issues, emerging technologies, areas of research in computer science, and careers in the field. **Prerequisite: Introduction to Computer Science, Grade 11, University**

TGJ3M COMMUNICATIONS TECHNOLOGY, Grade 11, University/College Preparation

This course examines communications technology from a media perspective. Students will development knowledge and skills as they design and produce media projects in areas of live, recorded, and graphic communications. These areas may include TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also develop an awareness of related environmental and societal issues, and will explore college and university programs and career opportunities in the various communications technology fields. **Prerequisite: None**

TGJ4M COMMUNICATIONS TECHNOLOGY, Grade 12, University/College Preparation

This course enables students to further develop media knowledge and skills while designing and producing projects in the areas of live, recorded, and graphic communications. Students may work in the areas of TV, video, and movie production; radio and audio production; print and graphic communications; photography; digital imaging; broadcast journalism; and interactive new media. Students will also expand their awareness of environmental and societal issues related to communications technology, and will investigate career opportunities and challenges in a rapidly changing technological environment. **Prerequisite: Communications Technology, Grade 11, University/College**

AP Courses

ENGLISH LANGUAGE & COMPOSITION

An AP course in English Language and Composition engages students in becoming skilled readers of prose written in a variety of rhetorical contexts, and in becoming skilled writers who compose for a variety of purposes. Both their writing and their reading should make students aware of the interactions among a writer's purposes, audience expectations, and subjects, as well as the way genre conventions and the resources of language contribute to effectiveness in writing.

SPANISH LANGUAGE & CULTURE

The AP Spanish Language & Culture course takes a holistic approach to language proficiency and recognizes the complex interrelatedness of comprehension and comprehensibility, vocabulary usage, language control, communication strategies, and cultural awareness. The AP Spanish Language & Culture course strives to promote both fluency and accuracy in language use and not to overemphasize grammatical accuracy at the expense of communication. In order to facilitate the study of language and culture, the course is taught in the target language.

STUDIO ART – 2D DESIGN

AP Studio Art is for highly motivated students who are seriously interested in the study of art; the program demands significant commitment. It is highly recommended that studio art students have previous training in art. AP Studio Art is not based on a written exam; instead, students submit portfolios for evaluation at the end of the school year.

The goals of the AP Studio Art program are as follows:

- Encourage creative and systematic investigation of formal and conceptual issues
- Emphasize making art as an on-going process that involves the student in informed and critical decision making.
- Help students develop technical skills and familiarise them with the functions of visual elements.
- Encourage students to become independent thinkers who will contribute inventively and critically to their culture through the making of art.

CALCULUS AP

Calculus is primarily concerned with developing the students' understanding of the concepts of calculus and providing experience with its methods and applications. The courses emphasize a multi-representational approach to calculus with concepts, results, and problems being expressed graphically, numerically, analytically, and verbally. The connections among these representations also are important.

SECONDARY TIME TABLE

Period	Times
Homeroom	7:40-7:45
Period 1	7:45-9:05
Break	9:05-9:20
Period 2	9:20-10:40
Break	10:40-10:45
Period 3	10:45-12:02
Lunch	12:05-12:40
Period 4	12:40-2:00

US COLLEGE INFORMATION

www.ncaa.org (NCAA) Complete information about **NCAA** regulations (including eligibility requirements), statistics, links to member conferences and associations. The NCAA is made up of three membership classifications that are known as Divisions I, II and III. Each division creates its own rules governing personnel, amateurism, recruiting, eligibility, benefits, financial aid, and playing and practice seasons – consistent with the overall governing principles of the Association. Every program must affiliate its core program with one of the three divisions.

www.prepskills.com (PSAT, SAT) PREPSKILLS® specializes in preparing students for admissions tests to private/independent schools and American universities. As Canada's premier SSAT and SAT preparation provider, we employ a number of different tools to make certain that each and every student is assured in their abilities in order to achieve optimum results.

www.princetonreview.com (PSAT, SAT, ACT) Various test prep options available, pick one based on your own learning style: online, classroom, private tutoring.

<http://www.collegeboard.org>The College Board helps students connect with and successfully complete a high-quality college education. We provide resources, tools and services to students, parents, colleges and universities in the areas of college planning, recruitment and admissions, financial aid, and retention. The SAT and Student Search Service programs alone have helped millions of students of diverse backgrounds learn about colleges, apply and enroll.

UNIFORM REGULATIONS

Maple Leaf International School considers it important that students appear neat, clean and well groomed at all times.

ONLY UNIFORMS SUPPLIED BY ESPREE ARE ACCEPTABLE

GIRLS: Light blue blouse, long navy blue pants or navy skirt (knee length), fully closed black shoes, white or black socks. A navy Maple Leaf cardigan may be worn. 1 pair of earrings, small religious medallion inside blouse and a watch are permitted.
No nail polish.

BOYS: Long navy blue pants, black belt, blue shirt, fully closed black shoes, white or black socks. A navy Maple Leaf cardigan may be worn.
A small religious medallion inside shirt and a watch are permitted.

PHYSICAL EDUCATION: For boys and girls - navy blue shorts, blue polo with school name and crest, running shoes and white socks.

N. B. School uniforms are required on all field trips unless determined otherwise in advance.

THE PROPER WEARING OF THE SCHOOL UNIFORM IS FULLY SUPPORTED BY THE MAPLE LEAF COMMUNITY. Students who enrol at Maple Leaf do so with a full awareness of the dress code. Therefore, when a student and his/her family choose Maple Leaf, they implicitly agree to abide by the established expectations of dress and appearance.

FAILURE TO COMPLY: with these regulations may result in the student being sent home, or removed from class, items being confiscated, possible detention and/or suspension.

Grade 9 & 10 STUDENT SUPPLY LIST

<u>General Stationery</u>	<ul style="list-style-type: none"> • Pens, pencils, erasers, sharpener, ruler, Scotch tape • Small stapler & staples • Highlighters • Scissors • coloured pencils • Agenda (provided by school) • 1½" 3 ring binder with dividers and binder pages (for each course) • Laptop and Flash Drive
<u>Science</u>	<ul style="list-style-type: none"> • 1 exercise book for lab observation • 1 Calculator • 1 pack coloured pencils
<u>Geography</u>	<ul style="list-style-type: none"> • 1 Pack Coloured Pencils • 1 Ruler
<u>English</u>	<ul style="list-style-type: none"> • Dictionary
<u>Business</u>	<ul style="list-style-type: none"> • Highlighters • Calculator, Coloured pencils • Black fine point pen/marker
<u>Mathematics</u>	<ul style="list-style-type: none"> • 15cm ruler, • 30 cm ruler • Geometry Set, • Scientific Calculator • Graphing Calculator • Graph book
<u>Physical Eduction</u>	<ul style="list-style-type: none"> • Maple Leaf official PE Shirt & Shorts (available at Espree) • Running Shoes • Socks • Towel • Soap • Deodorant/Toiletries
<u>Spanish</u>	<ul style="list-style-type: none"> • Spanish → English Dictionary
<u>French</u>	<ul style="list-style-type: none"> • French → English Dictionary
<u>Music</u>	<ul style="list-style-type: none"> • Manuscript Paper • Folder with pockets

Grade 11 & 12 STUDENT SUPPLY LIST

<u>General Stationery</u>	<ul style="list-style-type: none"> • Pens, pencils, erasers, sharpener, ruler, Scotch tape • Small stapler & staples • Highlighters • Scissors • coloured pencils • Agenda (provided by school) • 1 1/2" 3 ring binder with dividers and binder pages (for each course) • Laptop and Flash Drive
<u>Mathematics & Business</u>	<ul style="list-style-type: none"> • 15cm ruler, 30 cm ruler • Black fine point pen/marker • Geometry Set, • Scientific Calculator • Graphing Calculator (optional, but recommended) • Graph book
<u>Geography</u>	<ul style="list-style-type: none"> • 1 Pack Coloured Pencils • 1 Ruler • 1 Calculator
<u>English and Writer's Craft</u>	<ul style="list-style-type: none"> • Dictionary and Thesaurus
<u>Physics</u>	<ul style="list-style-type: none"> • Scientific Calculator • Graph Paper • 30cm Ruler • Protractor
<u>Parenting and Food & Nutrition</u>	<ul style="list-style-type: none"> • Large Notebook • Bristol Board, Craft Paper, Bag • Binder dividers • Apron, Food pictures from magazines
<u>Biology</u>	<ul style="list-style-type: none"> • Binder Dividers
<u>Music</u>	<ul style="list-style-type: none"> • Folder with pockets • Binder Dividers • Manuscript Paper
<u>Physical Education</u>	<ul style="list-style-type: none"> • Maple Leaf T-Shirt and Shorts (available at Esprey) • Running shoes and white socks • Shower kit
<u>Social Sciences</u>	<ul style="list-style-type: none"> • Calculator Folder with pockets • Dictionary
<u>Laptop</u>	<ul style="list-style-type: none"> • A laptop is not a requirement but many students, especially those in Grades 11 & 12 are finding a laptop to be an excellent way to organize their work.

GRADE 9 – 12 ART SUPPLY LISTS

The following supplies must be purchased or bought from home by the student and brought to class daily:

- **Journal** – 2 Inch Binder
- **Pencils:** HB, 4B, 6B
- **Pens:** Ball point, ink pen, gel pen – black
- **Fine & Medium Felt Tip Pens:** i.e. Sharpie, Pilot Razor point or other
- **Ruler:** 12 inch or longer – clear plastic, or metal
- **Case:** to hold above supplies. You may make this from cloth or use a box. Please label all your supplies with your name.
- **Portfolio Case:** two sheets of Bristol board/more study material
- **Old Shirt:** to use as a smock. Please protect your uniform!
- **Paint** (acrylic and tempera), brushes, coloured pencils, chalk and oil pastels are provided for your classroom use. However, you should purchase these for completing assignments at home as well as if you prefer to use your own particular brands during class.

Images: Begin collecting found glossy magazines, postcards, photos, doodles, sketches, textured paper and fabric scraps to use as personal visual references and to share as collage materials.

Collect: Discard old objects and magazine are needed for the art room

Resources: Most galleries around the world have web sites with virtual galleries that show master works of art. Periodicals (magazines), books (Maple Leaf International School's library has many recent edition excellent art books), newspapers, community galleries, and a trip to the National library in Port of Spain will enhance resources available to students. There is no textbook required for this course.

The Resource Journal

This course requires research on Art history periods and pictorial examples, which will be analysed and then used in the students own artwork. The researching and collecting of artwork over the Internet is essential to this course thus students must have access to the Internet as well as colour printing of the artwork. The resource journal acts like a visual diary that records all research and activities throughout the course. It must be kept neat and safe for the duration of the course as it accounts for 50% of the final grade as well as it plays an essential part in the Culminating Activity.
